

Really high tech development.

Cesi solar cell

Azur solar cell

Ennergy Azur space versus Cesi solar cells

- Azur
 - Nominal 2.4V 500mA @25 degrees Celcius.
 - Gives 1.2W -> 45 cells gives 54W (max) Price 238 Euro
 - Cesi
 - Nominal 2.26V 110mA @25 degrees Celcius.
 - Gives 1.15W -> 45 cells gives 51.8W (max) Price 139 Euro
-
- Delta ($54 - 51.8$) = 1.2W or 4.07% Loss Azur versus Cesi.

The above calculations are NOT taking into account that the efficient is varying by temperature and maybe not is semilar for the two brands.
